

# Defense Manufacturing Conference, December 2007

Tom Arnold, Andy Ulven, and Jon Tirpak (FDMC) eagerly share their knowledge about the numerous custom parts manufactured by The Ulven Companies.

Andy Ulven and Tom Arnold discuss an Ulven Ball Joint. The Ball Joint is one of several custom items manufactured by The Ulven Companies for the defense industry.

The Ulven Companies currently have over 200,000 ball joints in service on HMMWV's (High Mobility Multi-Purpose Vehicle) in Iraq.

Table display shows various other items manufactured by Ulven, including tie down rings, marine shackles, aluminum hubs for the Bradley, steering components, and a mortar base currently being used on the Howitzer.
